Welcome Address

Dear Delegate,

it is my pleasure to announce the 12th edition of the IPC Workshop, that will take place in Milan, from 28th to 30th March.
The Workshop will be held at Crowne Plaza Linate, near San Donato Hospital.
All participants and speakers will be accommodated into the congress venue to facilitate our networking activities. As you already know very well, the aim of the meeting is to give participants an update on the most important and innovative interventional procedures for the treatment of congenital and structural heart disease from fetus to adulthood.

Our Faculty will be represented by well-known and internationally recognized speakers, to guarantee a top level scientific program: lectures, lunch symposia, interactive sessions, satellite transmissions of live cases from well-known centers in Europe and Italy.

For this edition again, we will have a joint meeting with 3D Advanced Imaging, coordinated by Gregor Krings and Aimee Armstrong. An all-time going technical exhibition and a poster session will complete the panorama.

We will work in the usual friendly atmosphere that has always characterized the IPC Workshop: a meeting among long-lasting friends!

Looking forward to receiving you all in Milan, I send my warmest regards

Mario Carminati
President
